

## Rondani project

### Win-Win partnerships

Agence Nationale des Parcs Nationaux

Smithsonian  
Conservation Biology Institute

Farmers' Associations

Authorities

### AgroEco, an agroecology project for soil improvement

Vegetable food waste  
Organic material collection

Compost

LONG TERM SOIL IMPROVEMENT

### Enablers

**PROTECTION:**  
Fenced agricultural  
zones

**COMMUNITY:**  
Technique integration, skills development  
and efficient management

**ACCESS TO MARKET:**  
Local sourcing encouraged  
for industry caterers

### Anticipated benefits

#### BENEFITS FOR BIODIVERSITY:

Less slash  
and burn

Less deforestation and  
habitat fragmentation.

Fewer logistics

Less disturbance to wildlife

Fewer carbon emissions

Less retaliation

#### BENEFITS FOR FARMERS & COMMUNITIES:

Increased safety for farmers

Fewer crops losses

Biodiversity conservation  
awareness raised

Jobs and transfer of skills  
for maintenance of fences,  
compost making, etc.

Improved subsistence  
farming and opportunity  
for additional source of  
revenue

#### BENEFITS FOR ASSALA, ITS STAFF AND ITS CATERERS:

Fresh fruits and vegetables  
for Assala personnel

Better control of catering  
costs: fewer logistics and  
less food waste due to  
transportation damage

Increasing community  
autonomy through  
economic diversification

Reduction of domestic waste

**TURNING HUMAN-ELEPHANT CONFLICT  
INTO HUMAN-ELEPHANT COHABITATION**
